2024: more broken records, extreme weather and increasing climate risks

Alone, Europe can lead... but not succeed

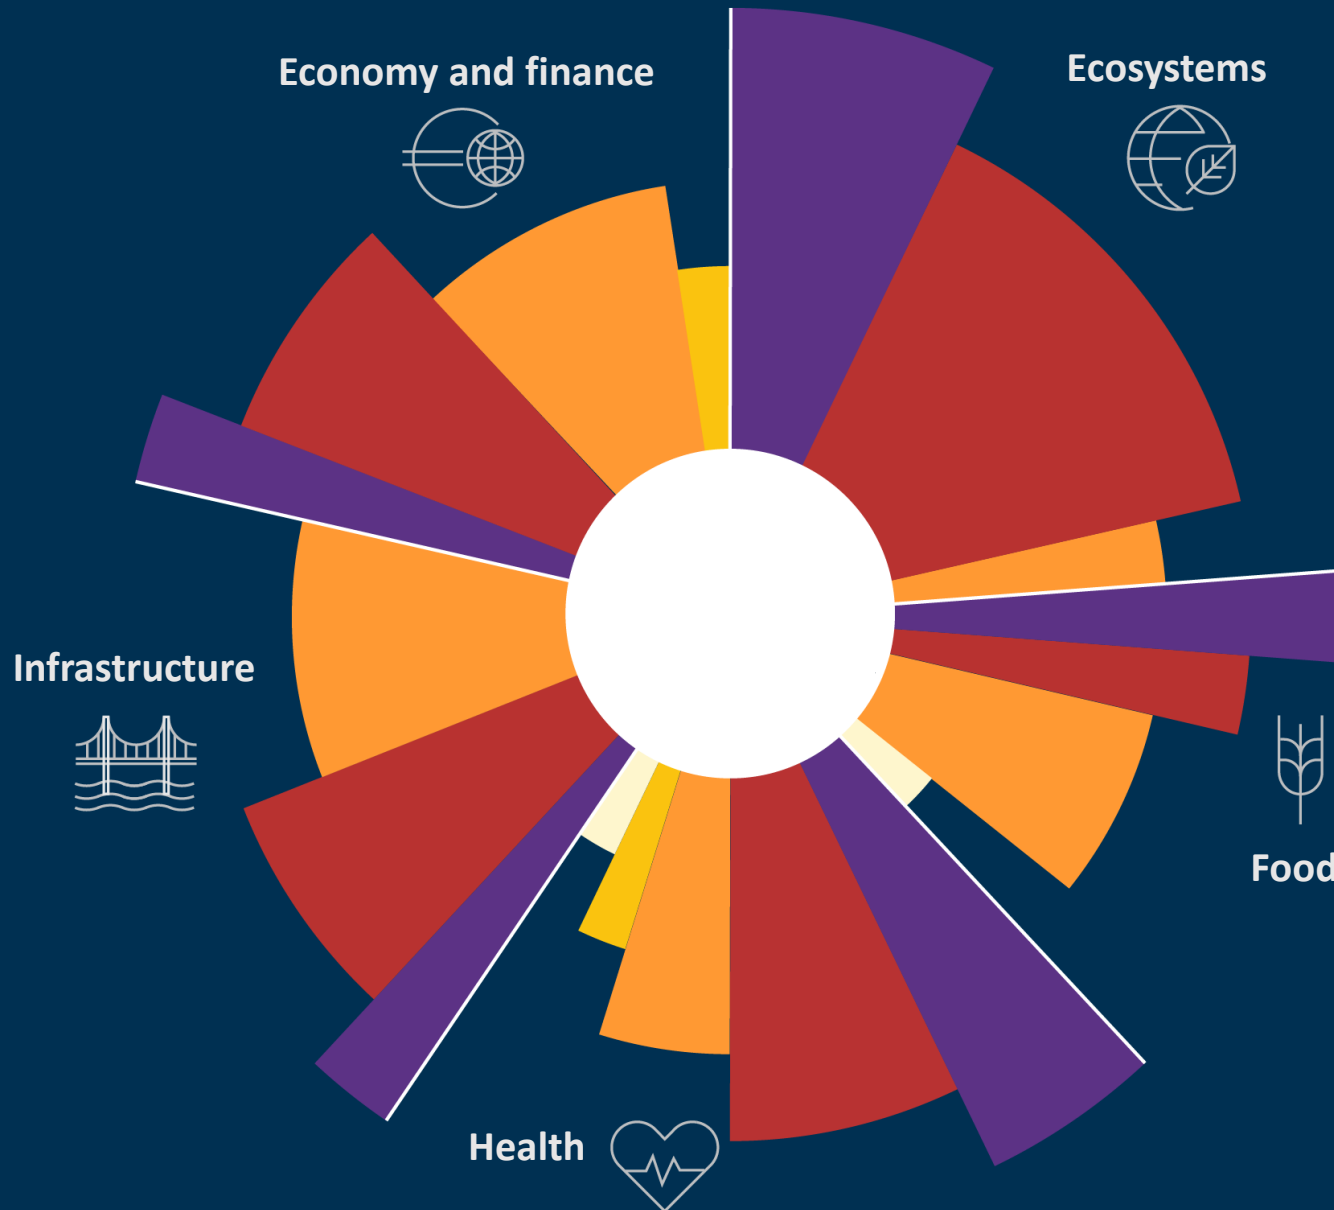

Methodology key

Will the targets be met by 2030?

-  It is very likely
-  It is likely but uncertain
-  It is unlikely but uncertain
-  It is very unlikely
-  It is unclear

EUCRA: major climate risks for Europe in five clusters

- Urgent action needed
- More action needed
- Further investigation
- Sustain current action
- Watching brief

EEA: Shaping the policy discourse and supporting implementation

1 Biodiversity and ecosystems

3 Human health and the environment

2 Climate change mitigation and adaptation

4 Circular economy and resource use

5 Sustainability trends, prospects and responses

Key topics for the environment, society and business

SOER 2025 – an integrated assessment focused on sustainability

Themes

- Biodiversity and nature
- Land and soil
- Climate change
- Air pollution
- Chemical pollution
- ... and other themes

Sectors

- Agriculture
- Marine fisheries
- Forestry
- Transport
- Eco-industries

Systems and sustainability transitions

- The food system
- The energy system
- The mobility system
- Sustainability transitions

Who we are

38 countries

More than **600 institutions**

Around **3000 experts**

Organised in **12 Eionet groups**

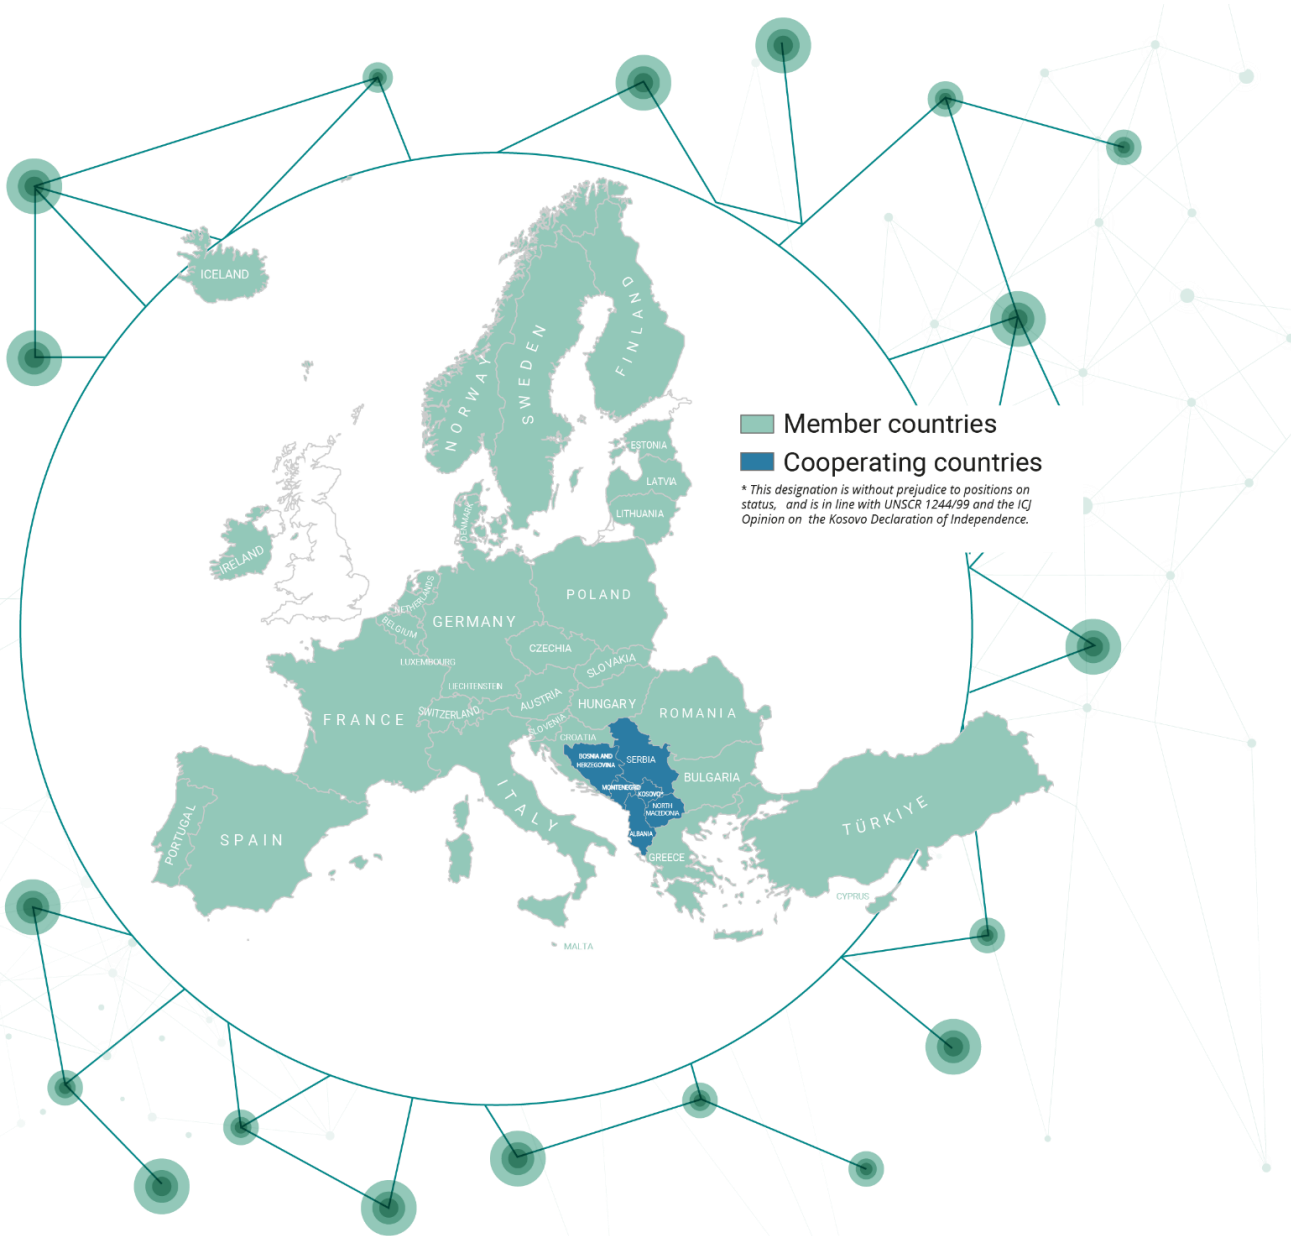

Supported by experts in **7 European Topic Centres**

What we do

Delivering **data, information and knowledge**

The European environment – state and outlook

Support for **EU and National policy**

Fighting disinformation

Thank you
